6. seat unit (for babies from 0 to 36 months according to EN standard and for babies from 6 to 36 months according to ASTM standard)
7. multifunctional foot cover
8. bottom shopping bag

## Dimensions

## Functionality

### All functions with one hand

Stroller engineering is as convenient as possible. You can fold, unfold the stroller, remove, adjust and install the stroller unit with one hand. Everything is simple, safe, and not least, it is safe and comfortable.

### LED lights

Two headlights in the front of the frame turn on when easily pressed. Two modes (flicker and static light) are used for safety and road lighting.

### Reflective print

A significant feature of the stroller design is a reflective print. Texts, lines and encrypted coordinates on the stroller are made with a unique application that displays light when it hits. This not only makes Quant more visible and safe during evening strolls, but also special. Take a Quant picture with flash, and you'll see!

### Recycled materials

Quant is a conscious product that has become part of the solution of plastic boring. The hood and some of the inner textile elements of the stroller are made of recycled materials\*. Each stroller is more than a kilogram of recycled plastic.

\* All materials are certified and entirely suitable for use in children's products
