

m/type ***PRO***

**Everywhere
in motion**

Forget about classic plastic cots, Anex m/type PRO turns the world of strollers upside down.

This model is created with smart fashion in mind, acknowledging the importance of high-quality materials and environmentally friendly production. The model is improved by innovative EPP material (Expanded Polypropylene) that makes it lighter without compromising on strength or safety.

OWN MICROCLIMATE

The EPP material has a high temperature resistance and insulation factors. It ensures warmth in winter and coolness in summer.

NEW GEN PROTECTION

The cot provides lightness and durability, especially in case of impacts during transport. Due to the strength of EPP material, it is also used in the production of car seats, safety helmets and vehicles.

LULL-IN-COT

Thanks to its smart design, Carrycot PRO can be easily removed from the frame and rocked like a cradle.

BREATHING SYSTEM

The stroller is equipped with a complex air circulation system that provides ventilation in the bottom, in the hood and in the mattress of the cot, in the footrest and hood of the seat unit.

LASER SHAPING

The texture was created using innovative laser ablation technology. This is the first case in the stroller industry.

ALTERNATIVE TO PLASTIC

The EPP material is 100% recyclable, unlike most plastics, which stay with us forever. Steam consumption during production was reduced by up to 80%.

LIGHTWEIGHT COT

Carrycot PRO is 1 kg lighter than standard plastic cots — it weighs only 3.5 kg.

THE BUTTONS MEMORY SYSTEM

It is easy to adjust the hood of the cot and remove the carrycot from the frame with one hand thanks to the buttons memory system. It keeps the buttons pressed, making the stroller more comfortable to use.
